

MANAGER'S COMMENTARY

GREG PAYNE, MA, CFA

October added to September's dramatic equity market gains, largely based on good third quarter earnings reports and continued US dollar depreciation. In keeping with the latter theme, commodity prices also surged, with many precious metals and agricultural commodities adding to records set in the previous month. Only North American natural gas bucked the trend, with the prospect of new supplies of shale gas keeping a lid on the price. As currency volatility has risen and fresh rounds of US money creation are mooted, commodities are again coming to be seen as strategic assets. The battle over Canada's Potash Corp and China's restriction on exports of rare earth metals to Western customers are two recent examples of this trend.

Earnings in environmental sectors remain mixed. Utilities and short-cycle businesses selling into the consumer supply chain have generally fared well. However, orders for long-cycle investments in critical infrastructure such as rail or the electricity grid have been slow to materialize. Economic and financial volatility have kept potential customers for these products cautious, but we still firmly believe these investments must be made in due course. After getting more fully invested in the summer, fund activity was low in October. We added to our positions in Australian wind developer, Infigen, and Canadian leak detection company, Pure Technologies.

The investments discussed above may not be suitable for all investors. Some conditions apply. Investors should carefully review the Fund's Offering Memorandum, including the risk factors detailed therein under the heading "Risk Factors", prior to investing in the Fund. The indicated rates of return for the Fund, if any, are historical total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. There can be no assurance that the Fund objectives will be met. The Morgan Stanley World Index has been chosen as the benchmark for the Fund because it is the most relevant available index for comparison given the diversification of the Fund. The Fund is not guaranteed, its value changes frequently and past performance may not be repeated. Any opinions expressed in the commentary are those of the author and do not necessarily reflect the views and opinions of the Manager or any distributor of the Fund. The views expressed are of a general nature and should not be interpreted as investment advice to you in any way. Please consult a qualified financial advisor before making an investment decision. The portfolio manager/advisor/sub-advisor has a direct interest in the management and performance fees of the Fund, and may, at any given time, have a direct interest in the Fund itself.

The investment objective of the Fund is to outperform the Morgan Stanley World Index over a full market cycle. The Fund invests in publicly listed companies located around the world that operate in our targeted environmental sectors and that we believe are trading at a discount to their future cash generation potential.
